

ENERGY POLICY

Helwan Cement Company

In line with the group's sustainability and energy policies, Helwan Cement Company acknowledges the need to move toward a low-carbon economy while alleviating social impacts.

The company is committed to playing its part in developing practical and feasible solutions, together with the Egyptian Government and other responsible players in the building material sector.

The company is strongly committed to complying with all applicable legal requirements related to energy management and to improving energy efficiency as part of a continuous improvement process.

The company aims to reduce energy intensity and set public targets for reducing the carbon footprint of operations and products, aiming to achieve results at or beyond the expectations of the international agenda and in line with the commitments made within the building material sector.

The company is committed to ensuring the availability of information and resources to meet public and private objectives.

The company is strongly committed to incorporating energy efficiency as a key component for new equipment, services, major renovations, procurement, and new design.

We also strongly support and encourage our employees' engagement in reducing their energy and carbon footprint and switching to sustainable mobility, while preserving reasonable well-being and comfort.

The energy policy applies to all the company's activities and business partnerships, as well as to stakeholders involved in the company's sphere of influence. This policy is constantly reviewed and updated to ensure its effectiveness.
