

ENERGY POLICY

Kattameya Plant - Suez Cement Company

In line with Group's Sustainability and Energy policies, Kattameya plant acknowledges the need to move toward a low-carbon economy while alleviating social impacts.

The plant is committed to playing its part in developing practical and feasible solutions, together with the Egyptian Government and other responsible players in the building material sector.

The plant is strongly committed to comply with all applicable legal requirements related to energy management and to improve energy efficiency as a continuous improvement process.

The plant aims to reduce energy intensity and to set public targets for reducing carbon footprint of operations and products aiming at achieving results at or beyond the expectations of the international agenda and in line with the commitments made within the building material sector.

The plant is committed to ensure the availability of information and resources to meet our objectives and targets.

The plant is strongly committed to incorporate energy efficiency as a key component for new equipment, services, major renovation, and new design.

The plant promotes energy efficiency initiatives.

We also strongly support and encourage our employees' engagement in reducing their energy and carbon footprint and in switching to sustainable mobility, while preserving reasonable well-being and comfort.

The energy policy is applied to all the plant's activities and business partnerships and to all the stakeholders involved in the plant's sphere and business influence. This policy is constantly reviewed and updated to ensure its effectiveness.
