Suez plant achieves a year without Lost Time Injuries.

Suez Cement plant has achieved one year without lost time injuries since the last recorded incident. Suez plant staff and subcontractors managed to complete one year without lost time injuries on 4 June 2021.

On this occasion, Mohamed Shoala, Health and Safety Director, said "the completion of one year without lost time injuries by Suez Cement plant is not by chance, but it came as a result on our right choices as a team. Commitment to safety is not only about work practices, but a lifestyle for all staff and subcontractors".

"We believe that everyone is responsible in safety in Suez Cement, which underlines our objectives to always keep the work environment free of injuries and incidents within the group".

Eng. Ahmed Salah, Suez plant manager had confirmed that the group is exerting lots of efforts to reach a safe and healthy work environment by developing a substantive corporate safety culture and by raising employee awareness and concern for safety conduct. In addition to taking adequate steps to prevent accidents and injury; and providing training activities to all employees to ensure the institution of corporate culture of safety and to integrate safety as a core business strategy for the group.
